

To access the TME API, the user must:

1. Have an active developer account at www.developers.tme.eu
2. Have a key to authenticate to the API.

In the following step-by-step guide, we will walk you through the process of setting up the developer account and generating the API key.

REGISTRATION

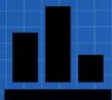

To create your account, click on the *Get access to the TME API* button on the home page.

Optimize your shopping process with TME API
We give you the power to make good business steps on our shopping platform. Quickly.

Products data
Catalogue and technical data for thousands of electronic components in multiple languages.

Warehouse stocks
Warehouse stocks from tme.eu updated in real time.

Actual prices
Prices with or without individual discounts for every single product in multiple currencies.

Changes in API security

We kindly inform that from 27 February 2017, the API service will be available only via the TLSv1.2 protocol.

We want to enhance your security while using the app, and the currently used libraries, i.e. SSLv3, TLSv1.0, TLSv1.1, are vulnerable to data capturing and deciphering.

More technical information can be found at

<https://blog.cloudflare.com/yet-another-padding-oracle-in-openssl-cbc-ciphersuites/> <https://cve.mitre.org/cgi-bin/cvename.cgi?name=CVE-2016-2107>

Fig. 5

CREATING A TOKEN – AUTHENTICATION

Once you have created your account, you need to generate a key that you will use in your app in order to be able to use all the functionalities of the TME API.

The private key is linked to your user account at www.tme.eu, it gives you access to product data as you would see it if you were logged in to your account at our website. What are the advantages of this option? Among other things, you will be able to see special prices that reflect your individual price list. If you want to query the API for market data, we still provide this option. To do so, you need to use the following phrase in the request header:

request-context: anonymous

How do I generate the key?

Log in to your developer account at www.developers.tme.eu and add new application. IMPORTANT: Creating an application is required to generate a private key.

Type in the application name and click on *Generate new anonymous key* (Fig. 6).

Application name:

Dear User, Anonymous keys have been disabled. To fully utilize the functionality of the TME API, please use a private key.

Fig. 6

The application has been successfully added and now appears in the applications list.(Fig. 7).

Dear User, Anonymous keys have been disabled. To fully utilize the functionality of the TME API, please use a private key.

eccommerce created at: 2025-03-03 09:42:51

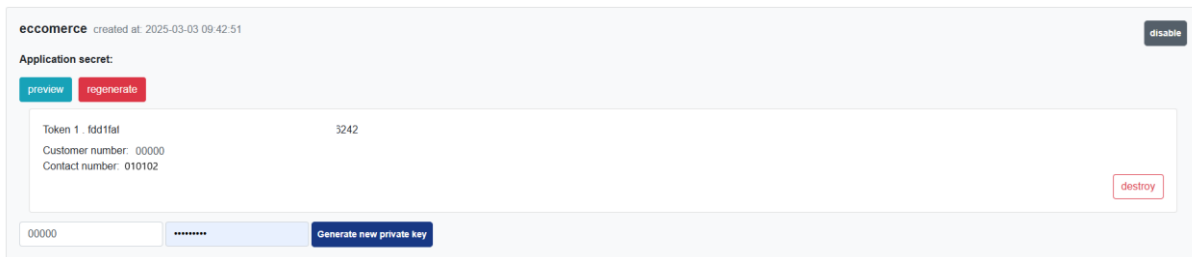

Application secret:

Fig. 7

To generate private key, use the previously added application (Fig. 7). To do so, enter your login details which you use to access your customer account at tme.eu in the *Enter TME login* and *Enter TME password* fields.

Once you have entered the details, click on *Generate new private key* to generate your private key token, which you can immediately use in your application.

The token is displayed right below the previously generated key.

Fig. 8

SANDBOX

At developers.tme.eu, you can test sample requests in the *Sandbox*.

Using the Sandbox, you can query the API with all keys you have generated. To do so, select the relevant token from the drop-down list (Fig. 9) and the request you wish to test by specifying the relevant parameters (e.g. product symbols) and click on *Send request*. On the right-hand side, you will see the parameters you have selected and, below them, the API response (Fig. 10).
